Our Amazing World

BY: MANUEL DAVID PATIÑO VILLAMARÍN

"You can see how the smallest things can be the most beautiful, awesome, strong, and incredible in all this universe. You never forget that you're as small as a sand nugget in this great universe, and you're as powerful as a hurricane 'cause you'll leave a mark on the world that will affect us for better or worse.

So you decide if you wanna be part of the change in the world and to show the good things in it.

Remember, you're powerful, incredible, and you don't know that great power that you have to change us."
